NCB Intertek SEMKO

S-Mark Certification Procedures

Applicants submitting a CB Test Certificate for the purpose of obtaining a National Intertek Certification Mark can be:

- A domestic or foreign manufacturer directly, or
- A commercial agent authorized to act on behalf of the manufacturer, irrespective of the country of residence.

The following documents should be submitted:

- Signed application form (available on request).
- Valid CB Test Certificate.
- Valid CB Test Report.
- Factory inspection report.
- Other relevant test results and product data such as manuals, photos, schematics, components list, artwork drawings etc. may also be required.

Additional information:

- Incoming CB applications have priority.
- Information on fees is available upon request.
- After review of the application, payment terms will be presented in the project quotation.
- Certification fee is invoiced when the application is accepted.
- Intertek will accept an annex to the CB Test Report covering the National Differences.
- The S Mark certificate is for valid 5 years (after issue of the test report), unless canceled earlier because of non-compliance, at the applicant's request or amendment of standards.
- Factory Follow-up Inspection service, involving periodic unannounced factory visits, is required as a condition of certification. Detailed information or components may also be required.
